U.S. Environmental Protection Agency

The District Engineer interposes no objection to issuance of a permit pursuant to Section 402 of the Federal Water Pollution Control Act Amendments of 1972, because it has been determined that the discharge of suspended solids is insignificant and will, in no way, affect anchorage or navigation.

Please notify this office of your decision on the application for any permit and, if approved, furnish us with a copy of the permit issued.

Sincerely yours,

LOUIS W. PINATA

Chief, Operations Division
